DESKTOP AUTHORITY MSI STUDIO PRO™

Central to a desktop lifecycle management strategy is the need to automate and standardize the deployment of software. To achieve consistent deployment of line-of-business applications across the enterprise, IT administrators need a powerful but intuitive environment to standardize and customize application installers.

Desktop Authority MSI Studio is a comprehensive application packaging solution that lets administrators achieve the results they want from MSI-based application installers. Whether building an installer for a legacy application, modifying existing MSI installers, or customizing an unattended install by developing a response transform (MST), Desktop Authority MSI Studio delivers dependable and consistent software installations.

## NEW! PRO VERSION FEATURES FIND PROBLEMS BEFORE THEY OCCUR

ZERO-TOUCH TESTING

Desktop Authority MSI Studio Pro lets you easily create a special MSI package which simulates the effect of the application installer on the target computer, but without actually making any changes. Now the administrator can identify which files and registry keys which will be over-written and changed without doing any damage.

CONFLICT RESOLUTION

Desktop Authority MSI Studio Pro adds a repository for storing MSI packages, which allows for easy reporting on where each package might conflict with others. With MSI Studio Pro the administrator can find and resolve problems with conflicting application installers before they occur.

Desktop Authority MSI Studio centralizes every aspect of application packaging into a single, administrator-friendly, easy-to-use interface, making packaging an efficient and productive task.

KEY BENEFITS

Standardized Desktop Environment
With complete control over application installation, IT administrators can standardize the features provided to users, and avoid conflicts and unlicensed activity.

Reliable Application Roll-out
Application installers can be tested and validated with Desktop Authority MSI Studio before they ever touch a production desktop.

Lower Desktop TCO
Standardized, reliable applications reduce user down time, IT support costs, and the cost of desktop ownership.

KEY FEATURES

Comprehensive Package Management
Desktop Authority MSI Studio's wizard-based UI guides administrators through packaging of legacy applications, repackaging existing MSIs, and creation of transforms (which customize the options during an installation.

Faster, Reliable Validation
Desktop Authority MSI Studio supports its own "MCE" validation technology, providing faster results with better accuracy than Microsoft's ICE, and guiding the administrator straight to the specific problem areas within the MSI table.

PRO Version Zero-Touch Testing
Create a special zero-touch MSI package which runs on the target and reports back problems without making any changes.

PRO Version Conflict Resolution
Find conflicts between MSI packages before they happen on the desktop.

SYSTEM REQUIREMENTS

Package Management
Windows 2000 or later, .NET framework 1.1

Package Deployment
All versions of Windows that support Windows Installer:
95/98/ME/NT/2000/XP/2003/Vista

LICENSING

Each Desktop Authority MSI Studio license allows the product to be used by one administrator.
